

Batteries

1.5Volt holder with wires

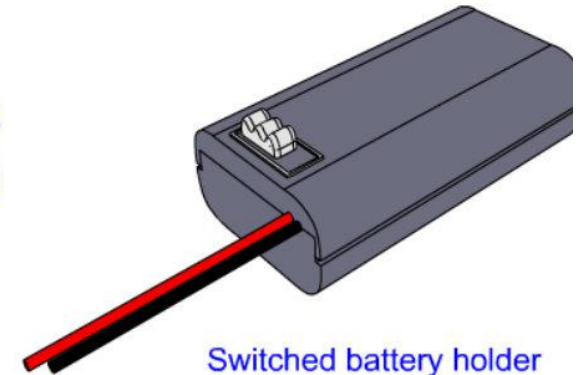

The Kre8 kits use
1.5 volt batteries type AA
(also called LR6 or MN1500)

Kre8 Manual Controller

Safety

DO NOT use rechargeable batteries as they can discharge their electric current fast if a 'short circuit' is made. This causes the battery to get very hot and explode and cause a fire.

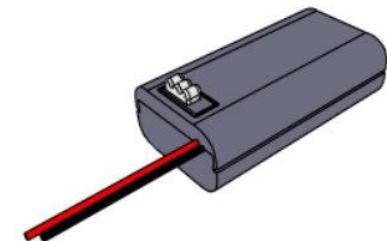

Switched battery holder
3Volts version

All the battery holders shown
use AA batteries.

3 Volt holder
for use with
clip connector

Switched battery holder
