

Basic Tools:

Snips

Used to cut blocks off the clip-connectors and the multiblock-connectors

Pen, Pencil and Rule

Used to 'mark out' before cutting slit-rods, tubes, sheet material and card.

Abrasive Paper

Used to round and smooth the slit-rod and tube ends etc.

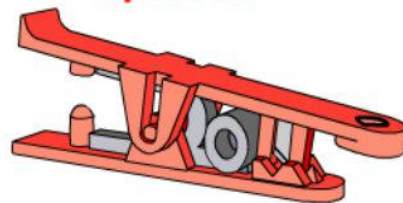

Kre8 Cutter

Used to score slit rods so they can be snapped off to your length. Kits etc. do not need this - useful for a whole class situations or large groups and open ended work.

Abrasive paper

Optional

Maybe needed Tools:

Hole punch

Used to punch holes in sheet material. - hole 5mm dia. -

Reamer & Countersink

Very rarely used but handy to enlarge holes or to countersink any hole drilled

Electric Work

Screwdriver

Some electric circuits may need the use of a screwdriver

Wire Strippers

Used to strip electric wires for use with circuits. It can also be used to cut the Kre8 slit-rods but the ends will not be so neatly cut off.
